

Introducing the revolutionary Concrete Fence Posts

Posts that will last a lifetime!

YES, weather resistant in all sorts of conditions. Moisture and dry will not affect integrity of the post.

YES, termites and ants will not eat the posts.

YES, they are strong and durable. Made with 40MPA concrete, and prestressed with two strands of high tensile wire

YES, they will not burn or ignite in a grass or bushfire. Cannot be used as firewood.

YES, you will save time - holes are predrilled, posts are uniform in size, easy to attach brackets for stays and gate fittings.

YES, they become an asset to your property. You will save money with very low maintenance costs.

YES, they are reusable. No precious forests were cut down to make your fence posts.

YES, ideal for organic farming. Concrete posts will not seep harmful chemicals into the soils. Plants can be planted directly next to the fence.

YES, you'll have peace of mind, knowing they're made in Australia, to strict quality controls, they're strong and a serious long term no fuss fencing solution.

YES, posts are easy to paint with standard outdoor paint and will be low maintenance.

YES, they will not increase the rate of rust in your wire. There is very little lime content in the special recipe of concrete mix we use.

Yes they can survive high acid sulphate soil conditions.

Yes you will not get splinters and don't need to use chainsaw to drill holes.
